

Scientific Visualization for Ocean Data

Yeon Gyoung Gwack
University of California, Santa Cruz
March 5, 2007

Procedure

- Overview
 - What is scientific visualization?
- Data types
- Current visualization methods

What is visualization?

- Scientific visualization (SciVis)
- Compress a lot of data into one picture
- Correlations between different quantities both in space and time
- Interactive display and analysis of data

Data types

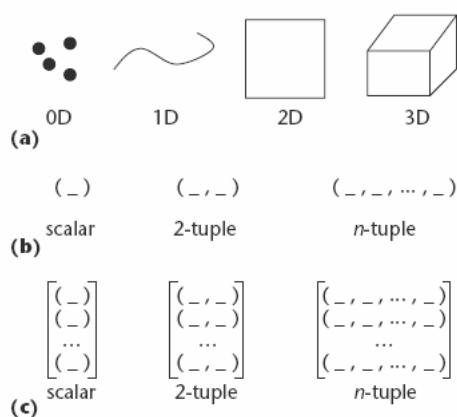

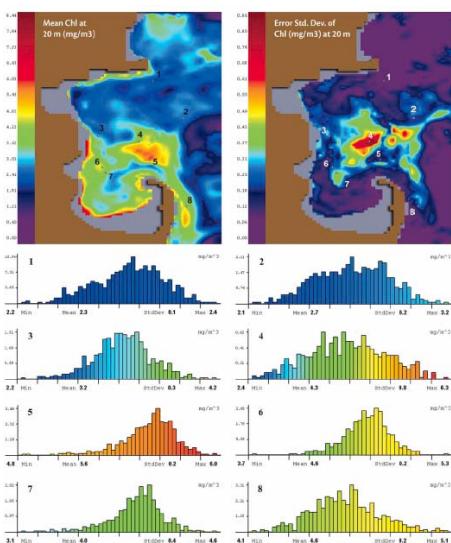

Illustration and comparison between (a) multidimensional, (b) multivariate (at each location), and (c) multivalue (at each location) data

Alison Love, David Kao and Alex Pang,
Visualizing Spatial Multivalue Data, IEEE Computer Graphics and Applications, May/June 2005.

Current Visualization Methods

- Pseudocolor and Histogram
- Volume Rendering
- 3D surface Contour (Isosurface)
- Glyphs
- Line Integral Convolution
- Streamlines

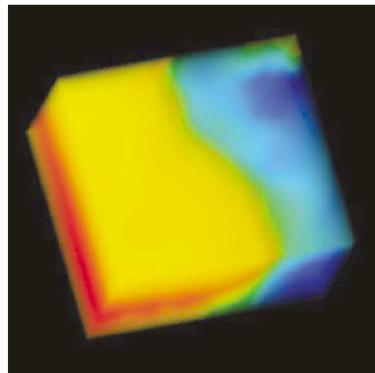

Pseudocolor and Histogram

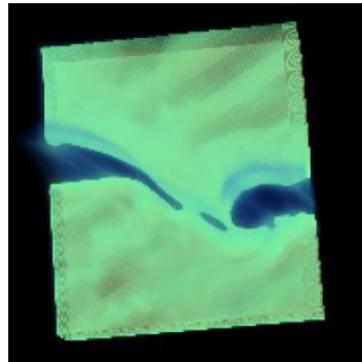

Chlorophyll mean and uncertainty of the Massachusetts Bay data set

Lermusiaux P.F.J., C.-S. Chiu, G.G. Gawarkiewicz, P. Abbot, A.R. Robinson, R.N. Miller, P.J. Haley, W.G. Leslie, S.J. Majumdar, A. Pang and F. Lekien, 2006. Quantifying Uncertainties in Ocean Predictions. *Oceanography, Special Issue on 'Advances in Computational Oceanography'*, T. Paluszakiewicz and S. Harper, Eds., Vol. 19, 1, 92–105.

Direct Volume Rendering

(a) Mean salinity

(b) Standard deviation

The data is based on the Middle Atlantic Bight shelfbreak, off the east coast of the United States.

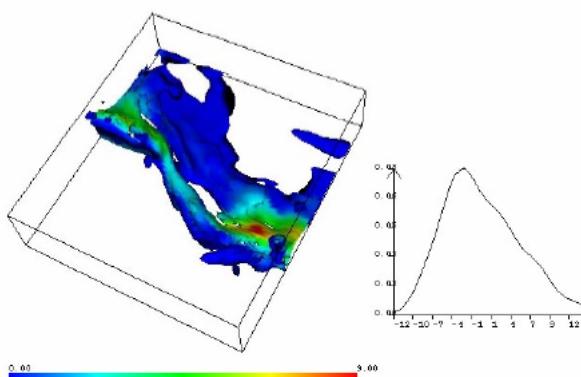

(a) Suzanna Djurcicov, Kwansik Kim, Pierre Lermusiaux, Alex Pang.

Visualizing Scalar Volumetric Data with Uncertainty in Computers and Graphics, vol 26, 2002, pp. 239–248.

(b) Alison Luo, David Kao, and Alex Pang.

Visualizing Spatial Distribution Data Sets IEEE Visualization Symposium, Grenoble, France, May 2003

Isosurface

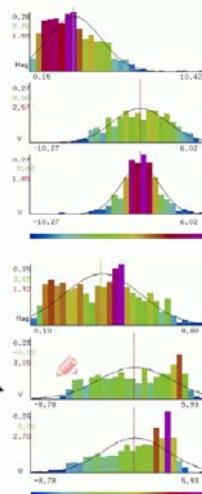

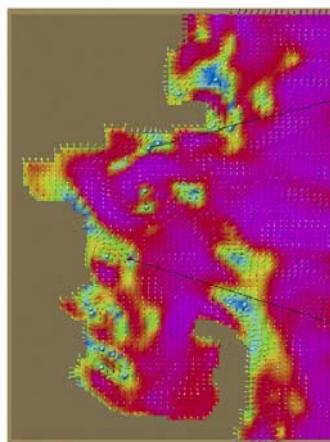

An isosurface using a reference distribution within the mixing region

The data is based on the Middle Atlantic Bight shelfbreak, off the east coast of the United States.

Alison Luo, David Kao, and Alex Pang.

Visualizing Spatial Distribution Data Sets IEEE Visualization Symposium, Grenoble, France, May 2003

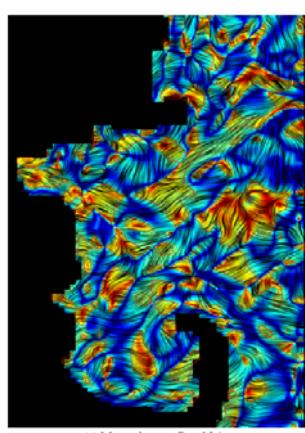

Glyphs

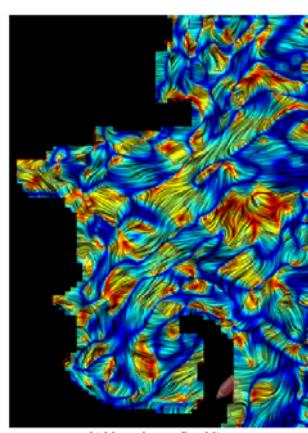

Lermusiaux P.F.J.,
*Uncertainty Estimation and Prediction
for Interdisciplinary Ocean Dynamics, J.
Computational Physics,
Special Issue on "Uncertainty
Quantification", J. Giann and G.
Karniadakis, Eds., 2006.*

(a, left) Mean horizontal velocity magnitude(color mapping) and directions(arrows).
(b, right) Local PDF's of surface velocity of the Massachusetts Bay data set

Line Integral Convolution

(a) Massachusetts Bay Major

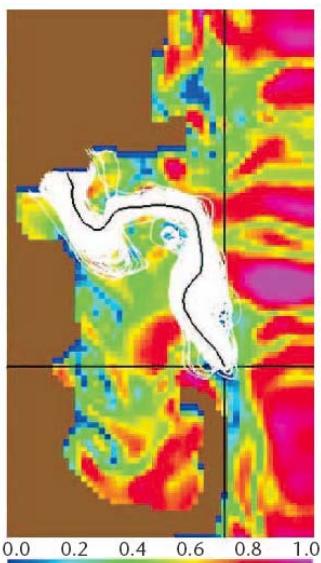

(b) Massachusetts Bay Minor

Two sets of LIC images showing the composite eigenvectors
of the Massachusetts Bay data set

Xiaoqiang Zheng Alex Pang
2D Asymmetric Tensor Analysis, to appear in IEEE Vis 2005

Streamlines

Conventional spaghetti plot from a seed point

Alison Love, David Kao and Alex Pang,
Visualizing Spatial Multivalue Data
IEEE Computer Graphics and Applications, May/June 2005.
